

America's Lost Colony

Has the mystery of Roanoke finally been solved?

In 1587, 117 people set sail from England for America. They were the first English colonists, families eager to start fresh lives in a new world. They had been sent by Queen Elizabeth's most trusted advisor, Sir Walter Raleigh. They were headed to the bountiful shores of Chesapeake Bay, near present-day Maryland. Raleigh was hopeful the settlement would be a huge success for the colonists—and for him. A thriving colony would make Raleigh even more important in Queen Elizabeth's court.

But the colonists never reached Chesapeake Bay. For mysterious reasons, the admiral of their fleet of ships sent them ashore one hundred miles south, on a sandy island known as Roanoke. Then the ships sailed away.

The colonists knew they were in trouble the moment they landed on Roanoke. The

year before, a group of English soldiers had built a fort on the island. The soldiers had made enemies of the area's Native American tribes. The colonists weren't safe on Roanoke. Plus, the sandy soil was unsuitable for planting. They would starve without fresh supplies.

Within a week of landing, the colonists' leader, John White, set sail back to England. He promised to return in three months with supplies. But a war between England and Spain made his return impossible for three years. When White finally returned to Roanoke, he was shocked by what he found: nothing. He could not find one trace of the colony. Brokenhearted, White returned to England.

So what happened to the colonists? And why had they been left on Roanoke in the first place? New research suggests that they were actually doomed before they left England. Sir Walter Raleigh had made enemies in Queen Elizabeth's court. These men knew the failure of the colony would help ruin Raleigh's reputation. So they persuaded the admiral of the fleet

to leave the colonists at Roanoke. The colonists, they knew, would be massacred by hostile Native Americans. Raleigh would be destroyed. And nobody would discover the evil plot. Unfortunately for the 117 colonists, the plan worked all too well.
